Dear Siliva,

Thank you very much for message below. We very much appreciate your effort taking our request into consideration. Having IoC Task Force of UN associated to our EMJMD application for the EMMAH programme would be very valuable for all.

The EMMAH master has started in 2017. There are currently 2 cohorts of students undergoing their studies. The joint degree awarding will be for the first time in Automne 2019.

For further information about the EMMAH programme, please consult the website :

www.emmah.eu .

Please let me know, if you need any information further for the next IoC Task Force meeting.

Best wishes for the New Year 2019 !

Hi Jutta,

our IoC Task Force has planned a meeting on the week of 17th jan, where they'll discuss about this.

I'll let you know then how they have decided to proceed.

Thank you and happy new year!

Silvia

Oggetto: EMJMD associated partner search

Dear Colleagues from the Utrecht Network,

I hope you are all well!

Our faculty of health engineering and management (ILIS) offers since 2017 a European joint master degree in Medical Technology and Healthcare Business : www.emmah.eu

The consortium is composed by two other partners institutions, the University of Applied Sciences Hamburg, Germany, and the Politécnico do Porto, Portugal. EMMaH programme is an innovative, interdisciplinary European joint master allowing graduates to pursue a career in healthcare industry and seek opportunities for training and experience with a variety of medical technologies in the healthcare business.

Currently we prepare our application for an Erasmus Mundus Joint Master Degree under the 2019 call (deadline 14 Feb).

The consortium considers to associate organisations into EMMaH which will contribute indirectly to the implementation of specific tasks and activities, such as knowledge and skills transfer and the support of dissemination and sustainability of this master.

As a member of the Utrecht Network, we would very much appreciate having UN as associated partner to our EMJMD. We value in particular UN's Task Force Internationalisation of Curricula. We would like to invite the Task Force to take part in an independent external advisory board with regard to quality assurance review of the EMMaH programme during the EMJMD. Travel and subsistence costs related to transnational meetings are refunded by the EMJMD grant, if successful.

If UN is willing to support our EMJMD application and to become associated to our European joint master, we would like to invite you to send us your specific letter of intent, a template is attached.

Looking forward to your positive answer !

Wishing you all the best for a fantastic Christmas and a wonderful New Year 2019 !
